

#### Slide 1:

Welcome to our long overdue webinar with the TLM community. First off, there are a lot of other brokers out there who do some things right so the vote of confidence on your attendance is inspiring and well received. Mike is a great guy and if you read the testimonials of his students you can very well see where they are very happy with the TLM community. However, I must tell you that Mike's performance in trading is not typical at all. In fact, many people lose money day trading and the practice itself is extremely risky so please do your own due diligence before clicking the button. There is a better than average chance that you could lose a substantial amount of money and if you are shorting, you could lose all of your capital and the reason is because, simply, there is no price limit to how high a stock could go. Please take a moment to visit our website at [www.guardiantrading.com](http://www.guardiantrading.com) and read our disclosures at the bottom of our home page, there is some really useful information in there written by industry professionals. Whether trading is your hobby, side gig or full time job, we at Guardian Trading, a division of Velocity Clearing are really excited to have you here today, so again, thank you.

#### Slide 2:

Velocity is a clearing firm looking to provide you with tools you need to create your own success. Today, I'd like to focus on our Routing Options.

#### Slide 3:

When we look to provide you with for routing you are going to look at really execution speed and the ability to find a fill in lit and both markets. Just like many traders feel like they need to trade on both sides of the market, long and short, we try to give you the ability to route in Lit and Dark markets. For Max Liquidity Capture.

Slide 4:

Important to note Velocity will support QB and QX on OTCBB and if you reside in a country outside the United States, please note that we may accept your application for an account. Please check our FAQ section of the website for more information

Slide 5:

Many of our clients have visited our reporting HUB, please contact me for a complimentary statistical analysis of your account trades. While I don't provide you with advice on how to trade, I can point out stats on your trades that you may find useful. We have the capability to offer aggressive fills with rebates available. These routes are priced to compete with the biggest Market Makers on Wall Street.

Slide 6:

Today I want to highlight 5 possibilities available to you at velocity. Should you need additional Routing options or you want a custom wheel created for you, please reach out to me directly for pricing and availability.

Slide 7:

Customizable VWAP and TWAP orders, please contact me for availability. We can put you in touch with our desk in Boca Raton who can provide color on just how granular you can get with these orders.

Slide 8:

Really where you start with VWAP and TWAP is just balanced between lit and dark markets and add liquidity whenever possible. This is because you have the freedom to build to any spec you wish, again please contact me for further details.

Slide 9:

If you use DAS, feel free to check out VTRD – this is .00125 per share to remove and .0023 credit per share to add. Please note this is only during market hours. JOVV is liquidity capture-centric with aggressive waves configured based on a combination of economics and market share.

Slide 10:

The same for Sterling users but it is named QAMM. Should you use sterling at a different brokerage but wish to route here on this route, please reach out to me.

Slide 11:

If you use DAS, feel free to check out JOVV – this is .002 per share to remove and .0023 credit per share to add. Please note this is during the trading day, 4AM to 8PM. What this does is sweep the dark markets for best execution and compares that to the Lit markets. It fills where the price is better.

Slide 12:

In our final slide, this is an execution speed example. Please contact me offline for the specifics of this. I would be happy to go over your account and compare what you have questions on and how they may fit your strategy.
